«EURORUSS: PARTNERSHIP, EXPERIENCE, INNOVATIONS»

on wastes, water treatment and environmental management

19-20 November 2012

Poznan (Poland)

INFORMATION SHEET

On 9-20th of November 2012 in Poznan (Poland) there will take place the XVI International Environmental Protection Congress ENVICON (ENVICON), which is held within International ecological fair POLEKO.

International Congress ENVICON is currently the largest congress for environmental protection in the Central and Eastern Europe. Themes, which are discussed at the Congress, as well as valuable information and knowledge at the highest level, annually unite about five hundred participants, including representatives of the government and local authorities, representatives of the Polish and foreign companies, experts in the field of waste management, sewage treatment and sewerage. ENVICON Congress traditionally passes for 2 days.

On the first day during the opening session of the Congress there will be discussed the environmental policies at the global, European and national level taking into account initiatives of the European Union in the context of the "green" technologies management in Europe. There will be also considered the results of the Summit in Rio de Janeiro.

During the first general plenary session, there will be presented tasks and trends in the water treatment industry, in the field of waste management considering the new legislation of Poland. The resume of the session there will be a panel discussion with the participation of specialists of the primary position in the environmental sector in Poland and Europe.

Further meetings of the Congress ENVICON will be divided into two parallel sections concerning waste management and water management.

The first section will be devoted to the role of the state in the management of waste treatment system, the relationship between municipalities and regions, as well as the presentations of the best practices of cooperation.

There will be discussed changes in legislation and the evolution of methods of waste disposal, which is developing in the direction of thermal processing of solid waste and the production of alternative fuels. Besides there will be affected themes of mechanical biological recycling in the system of waste management and use of the old electrical and electronic equipment as raw material as well.

Theme of the second section of the Congress there will be rapidly developing in Poland industry of wastewater treatment. Speakers will analyze matters concerning municipal system of the wastewater treatment, water supply and sewerage in the countryside, the use the precipitation water in the city water sector and sludge treatment problems.

Both sections will be held in a dynamic and interactive way, and after each presentation will be given some time to discuss the questions. Results of the sections will let to determine the most actual and the most important matters, directions of the industry, to identify the prospects of cooperation in the environmental sector between the administration, businesses and other structures.

XVI INTERNATIONAL ENVIRONMENTAL CONGRESS

International Environmental Protection Congress
and

V EUROPEAN-RUSSIAN CONFERENCE
